THE WOODPECKER

STOP PRESS

Relocation

The completion of the shed is sooooo close. In fact the time has come to close the Besgrove Street Workshop.

The last session at Besgrove Street will be on Friday 7 June.

It is expected there will be no sessions for 3 weeks. Sessions are expected to start back in the new facility on Monday 1 July. However this date is not firm and may change at short notice. You will be kept informed so keep an eye on your emails.

Due to the relocation, the General Meeting scheduled for 12 June has been cancelled.

During the session times next week, members will start to empty the club of all its contents and load them into the container. The air conditioners will be uninstalled. Work benches and meeting room tables will be transferred to the container. The machinery will be disconnected from the ducting in readiness for the scheduled transfer on 19-20 June.

You will receive regular updates advising status or requesting assistance. Remember there will be growing pains and initially you may not find the tools you require. However some of this can be avoided if you can provide assistance with the move when requested.

Since this photo was taken, the apron in front of the workshop has been completed.
